While this is something I had wanted to have available in the past, the bulk of most KVMs that I have seen were more than I wanted to lug around with me. While the cables add some heft to the bag, the KVM unit is smaller than my cable tester or multimeter. <http://jlicentral.com/images/authors/command-and-conquer-red-alert-retaliation-manual.xml>

I can't snider this a reasonable trade off between utility and extra weight. Please try again later. JBA 5.0 out of 5 stars As my driver board for the screen has an input for VGA, I wanted to make one of those purposes a central monitor for handling mass computer repair on the go, instead of needing to work on systems one after another during onsite visits, or potentially being left to return or take systems with me. While this is something I had wanted to have available in the past, the bulk of most KVMs that I have seen were more than I wanted to lug around with me. No noticeable noise at 1920 x 1080. The only thing I didn't like was that the LEDs were hard to see unless I was directly above them. Please try again later. Please try again later. Marvin 5.0 out of 5 stars It also switches quite promptly and works every time. So far I have had it for over one month, it has not failed at all. Highly recommended, I would buy again if I should need another one. Please try again later. Please try again later. ELP 5.0 out of 5 stars Cuts down on wires only one wire with usb whip on the end to connect to computer. I like it. Can't beat it for the price. Please try again later. Please try again later. Paul A. Swartz 5.0 out of 5 stars Hooked up 3 different Windows computers and the hardest part was crawling around on the floor to plug them into the UPS. Don't worry that there is only one USB connector per cable. Both the mouse and keyboard and probably USB port 3 operate through it. Switching between computers is a 2 second delay. Please try again later. Please try again later. Paul Nuernberger 4.0 out of 5 stars No real issues, although it does disconnect the USB from units nor

Please try again later. Cab 4.0 out of 5 stars I attached the VGA connector and the USB connector on  
the other end of the PC1 cable to the appropriate ports on my main computer, and the VGA and USB  
connectors on the other end of the PC2 cable to the appropriate ports of my second computer. I used  
a device that connects both my old fashioned keyboard and mouse connectors to one USB male  
connector and connected that to the first female USB port on the switch. I then turned on my first  
computer. It booted up and worked until I tried to open a program. The first computer, which is very  
old, soon indicated that it had to reboot to finish installing the new hardware. I gave permission to  
reboot, and after rebooting it worked fine. After the first computer booted up, I turned on the second  
newer computer. It booted up and did not need to restart to finish installing the new hardware. I was  
able to switch back and forth between the two computers using the buttons on the switch.  
Everything seems to be working as expected. I have not tried anything with the other USB ports on  
the switch. I am not using switch ports PC3 and PC4. Both computers are Windows 7 desk  
tops. Sorry, we failed to record your vote. Please try again Giving me the impression it was cheaply  
made. I dont hold that against the product because it still works good enough for me. Sorry, we failed  
to record your vote. Please try again Sorry, we failed to record your vote. Please try again I think it  
works great. Sorry, we failed to record your vote. Please try again It is a manual switch and works  
great. The only problem that I have had with it is that it did not fully switch twice in the last month  
or so of daily use. If I was in the market for another one I would for sure buy it again. Sorry, we failed  
to record your vote.

Please try again Switch works flawlessly, have dual monitor setup 3 monitors between 2 computers,  
middle monitor switches between 2 computers, end monitors dedicated 2nd display to each  
computer and it works like a champ. Cables a bit short, but that is the only issue I have found. Sorry,  
we failed to record your vote. Please try again I can switch between running servers with ease. A  
slight delay when switching on the keyboard and mouse but not irritating at all. Sorry, we failed to
